

User Guide

Introduction

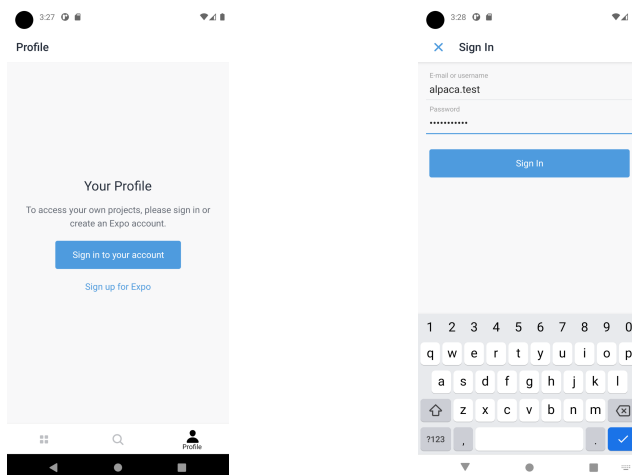

This App is built for assisting Alpaca Finance users on managing and monitoring Leverage Yield Farming positions.

Neither private key or passphrase are required in this app!

Install Expo Go here: <https://expo.dev/client> / <https://tinyurl.com/expo-apk-2-21-5>. This app is a pure React Native app. It operates through public defi APIs. Please contact the developer if you encounter any popup dialog asking for permission while using this app.

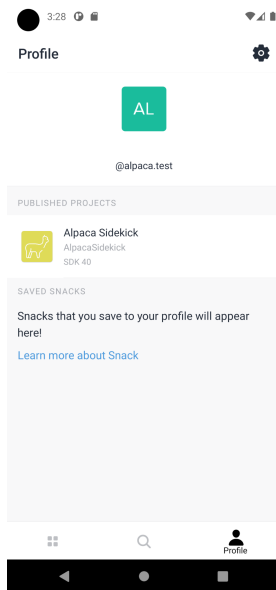

Install and Run Expo Go

1. Install Expo Go <https://expo.dev/client>
2. Login with the shared account (username: **alpaca.test** password: **alpaca.test**)

2

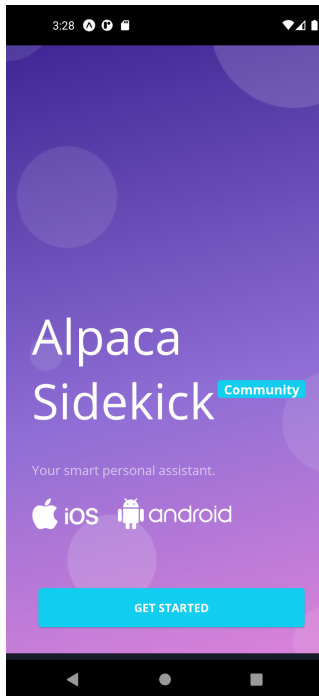

3. Click on Alpaca Sidekick Project

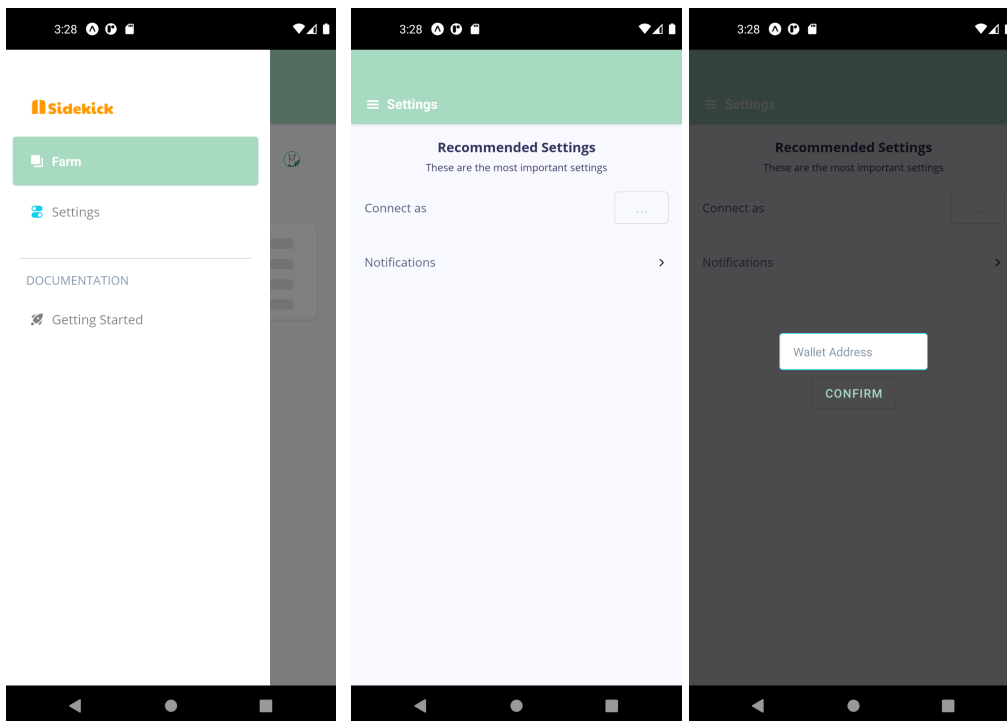

4. Download new update

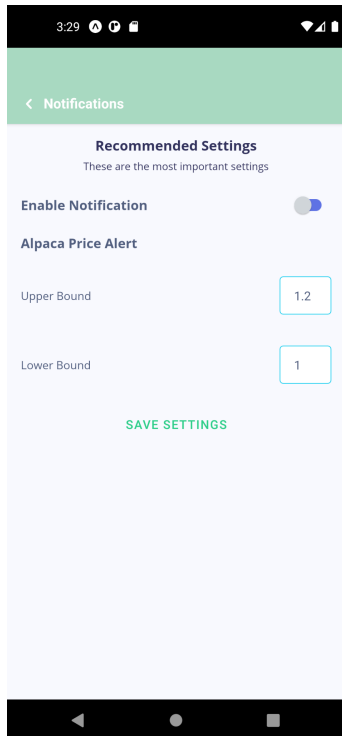

5. Start using your Alpaca Sidekick

6. Go to the Settings page and set up your Wallet Address

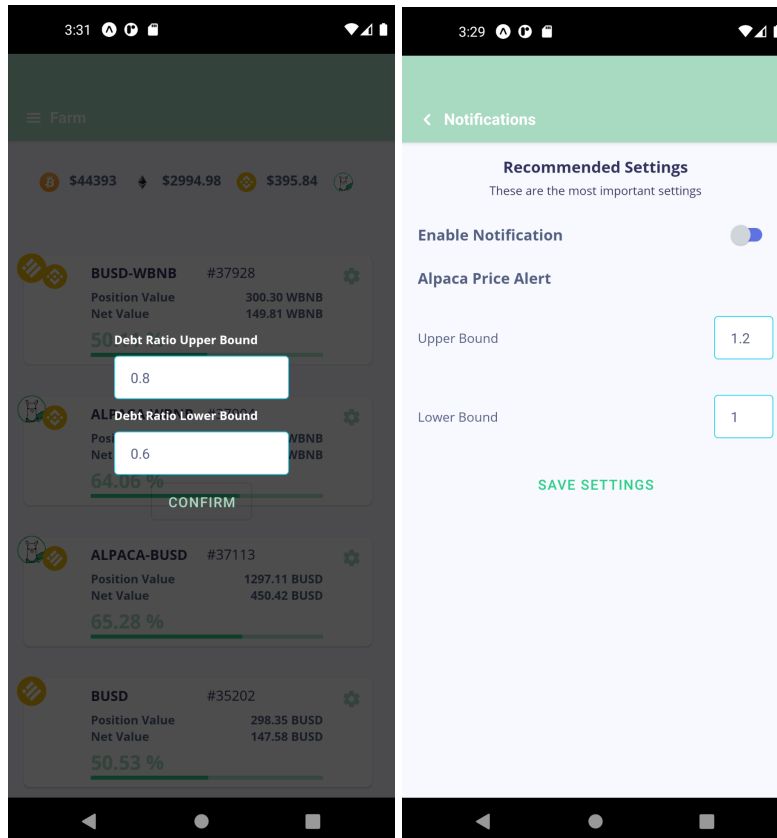

7. Go to the Notification page and configure your alert settings
Enable Notifications to receive alerts when the price of Alpaca coin is higher or lower than your settings

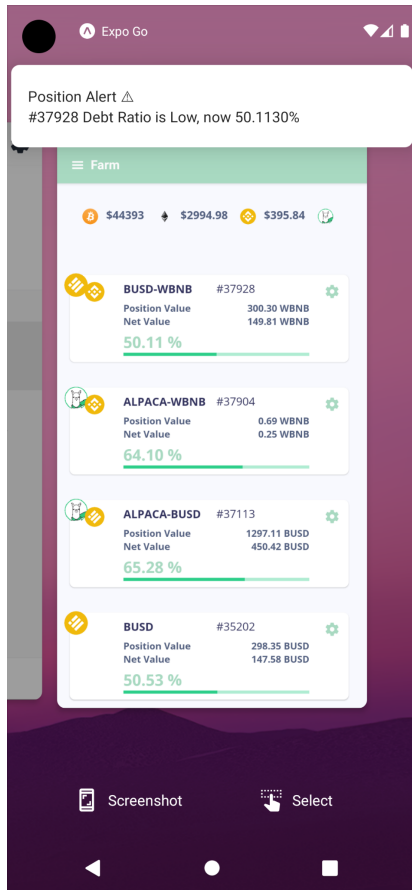

8. Go to the Farm page to view your active positions and to also view current coin prices

- Click the gear icon next to one of your positions to configure alert when your kill buffer of this position is higher or lower than your settings (You will only receive notifications when Enable Notification toggle is enabled in the Settings page)

10. You will receive notifications even when your app is running in background

iOS

notes

Notification function may not be reliable because of the limitation of iOS (Notification can be delayed or not sending on an iOS device)

Android

Installation

Via apk

1. Visit <https://tinyurl.com/alpaca-sidekick-182> to download Android apk (apk file size is large because of it has the dependency of Expo Component)
