User Guide

Introduction

This App is built for assisting Alpaca Finance users on managing and monitoring Leverage Yield Farming positions.

Neither private key or passphrase are required in this app!

Install Expo Go <https://expo.dev/client> , this app is a pure React Native app. It operates through public defi APIs. Please contact the developer if you encounter any popup dialog asking for permission while using this app.

iOS

Installation

1. Install Expo Go <https://expo.dev/client>
2. Copy and paste this link in your browser `exp://exp.host/@rickywo/alpaca_sidekick`
3. Allow Expo Go to open this link

notes

Notification function may not be reliable because of the limitation of iOS (Notification can be delayed or not sending on an iOS device)

Android

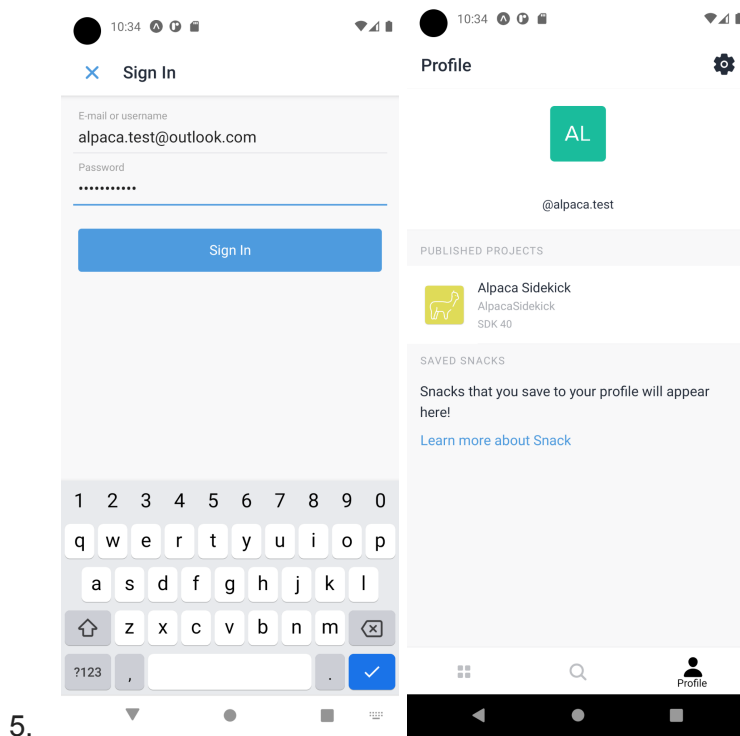

Installation

Via apk

1. Visit <https://tinyurl.com/vp5ppmak> to download Android apk (apk file size is large because of it has the dependency of Expo Component)

Via Expo Go

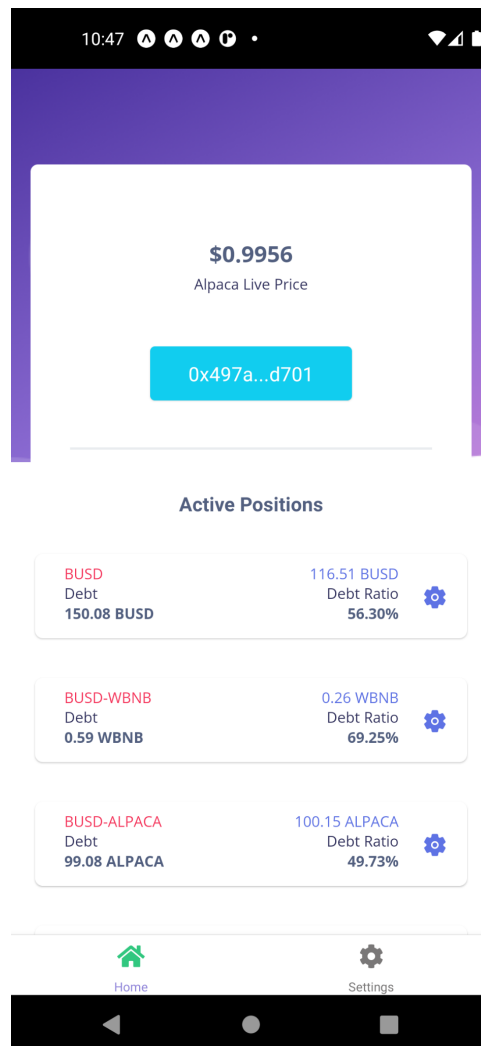

1. Install Expo Go <https://expo.dev/client>
2. Allow Expo Go to open this link
3. Login Expo with username: **alpaca.test** password: **alpaca.test**
4. **Open your browser and paste this link**
<exp://exp.host/@alpacamath/AlpacaSidekick>
in your browser and open it.

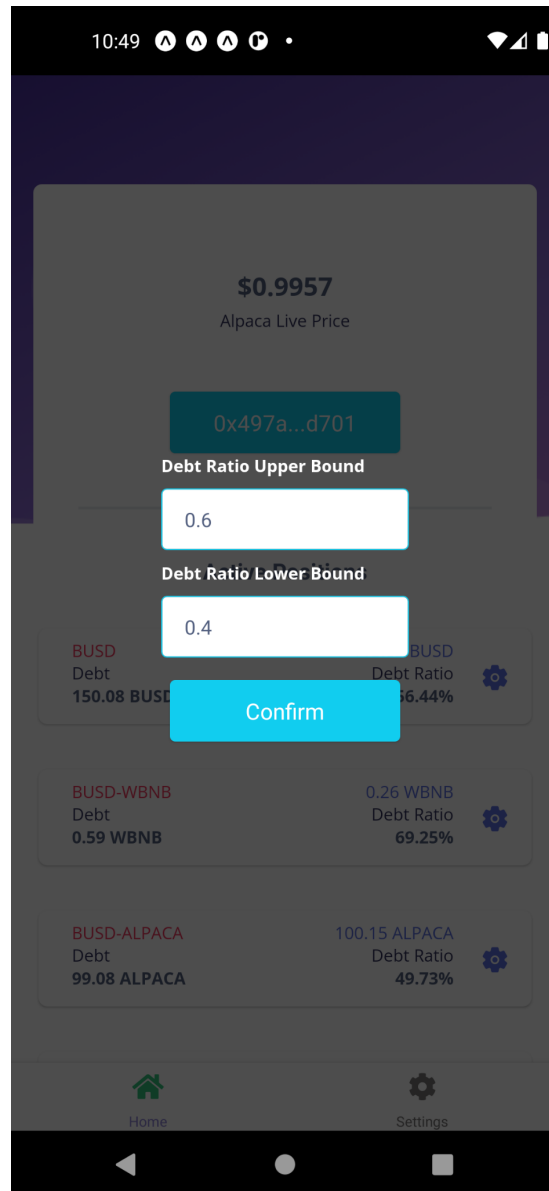

Pages

Alpaca live price is shown on the main page. The address button that allows you to set your wallet address in the app followed by a list of your Leverage Yield Farming positions.

A config button on the left hand side of an item is for configuring the trigger for debt ratio monitoring.

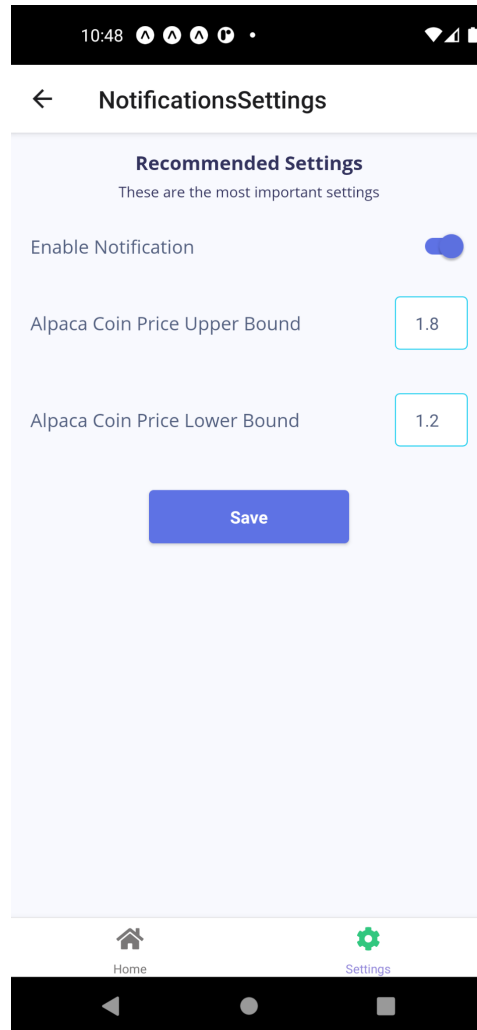

Notification config for Leverage Yield Farming Position. The user will receive notifications when debt ratio is higher than Debt Ratio Upper Bound or lower than Debt Ratio Lower Bound.

Setting Page for Live Price Monitoring

Enable Notification: Global toggle button for disabling/enabling sending notification
